David Reyes Alés

Backend Software Engineer · Distributed Systems · Real-time

davidreyesales@gmail.com · +34 685 206 804 · davidreyesales.com · LinkedIn · Madrid, Spain

Profile

Backend Software Engineer with 2.5+ years building real-time distributed systems and microservices in production. Backend experience across the JVM and Node.js ecosystems — Java, Spring Boot and NestJS — alongside containerisation, CI/CD and both SQL and NoSQL data stores. Track record of taking ownership beyond assigned scope, from architectural improvements to company-wide infrastructure.

Work Experience

Software Developer March 2026 - July 2026
The Reuse Company · UC3M Madrid, Spain

Developing production-grade software in direct collaboration with industry partners as part of the MSc programme, covering the full development lifecycle — design, implementation, testing, and deployment — within an Agile team.

`React/NextJS` `ASP.NET` `SQL` `HocusPocus` `SysMLv2` `Agile`

Full-Stack Developer 2023 – 2025
Axion · Telecommunications Spain

Joined a 3-person team to rebuild from scratch a nationwide real-time monitoring platform for broadcast infrastructure — a project that had failed over 1.5 years of prior attempts. Delivered in 6 months; adopted by +100 operations users, after all previous versions had been rejected.

- **Performance:** Identified CouchDB (NoSQL) bottleneck, introduced **Redis Stack** as caching layer (validated via POC), reducing load times **50–60%** (10–11s → 4–5s). Also enabled HTTP compression at zero infrastructure cost.
- **CI/CD:** Built GitLab CI/CD pipeline from scratch on own initiative, cutting deployment time from **5–8h to 40–60 min** (85%+ reduction), with automated test suites catching real production bugs before release.
- **Auth microservice:** Expanded an assigned login module into a centralised authentication microservice for the entire organisation, serving **+100 users** across multiple applications — a decoupled, centralised service design.
- **Map component:** Designed Angular + Leaflet interactive map handling thousands of real-time assets with non-trivial lifecycle management.
- **Mentoring:** Onboarded an intern, building reusable backend and frontend project templates with pre-configured security layers and CI/CD integration.

Education

MSc in Computer Science and Technology 2025 – 2026
Universidad Carlos III de Madrid Madrid, Spain

BSc in Software Engineering 2020 – 2025
Universidad de Sevilla Seville, Spain

Technical Skills

Backend	Java · Spring Boot · NestJS · Node.js · REST APIs · Microservices
Data & Infra	PostgreSQL · MySQL · Redis Stack · CouchDB · Docker · GitLab CI/CD · Linux
Other	Angular · React/Next.js · Python · JavaScript/TypeScript · Automated testing · Agile

Languages

Spanish Native **English** B2 First (FCE), Cambridge Assessment English, June 2023
