

David Reyes Alés

Backend Software Engineer · Java · Microservices · Distributed Systems

✉ davidreyesales@gmail.com · ☎ +34 685 206 804 · 🌐 davidreyesales.com · 🔗 LinkedIn · 📍 Madrid, Spain

Profile

Backend Software Engineer with 2.5+ years building real-time distributed systems and microservices in production. Solid foundation in Java, containerisation, CI/CD and NoSQL data stores. Track record of taking ownership beyond assigned scope — from architectural improvements to company-wide infrastructure. Currently completing an MSc at UC3M.

Work Experience

Software Developer — Industry Research Project

Universidad Carlos III de Madrid · Research Contract

Ongoing
Madrid, Spain

Developing production-grade software in direct collaboration with industry partners as part of the MSc programme, covering the full development lifecycle — design, implementation, testing, and deployment — within an Agile team.

React/NextJS ASP.NET SQL HocusPocus SysMLv2 Agile

Full-Stack Developer

Axion · Telecommunications

2023 – 2025
Spain

Joined a 3-person team to rebuild from scratch a nationwide real-time monitoring platform for broadcast infrastructure — a project that had failed over 1.5 years of prior attempts. Delivered in 6 months; adopted by 30–50 operations users, after all previous versions had been rejected.

- **Performance:** Identified CouchDB (NoSQL) bottleneck, introduced **Redis Stack** as caching layer (validated via POC), reducing load times **50–60%** (10–11s → 4–5s). Also enabled HTTP compression at zero infrastructure cost.
- **CI/CD:** Built GitLab CI/CD pipeline from scratch on own initiative, cutting deployment time from **5–8h to 40–60 min** (85%+ reduction), with automated test suites catching real production bugs before release.
- **Auth microservice:** Expanded an assigned login module into a centralised authentication microservice for the entire organisation, serving **hundreds of users** across multiple applications — an example of event-driven, decoupled service design.
- **Map component:** Designed Angular + Leaflet interactive map handling thousands of real-time assets with non-trivial lifecycle management.
- **Mentoring:** Onboarded an intern, building reusable backend and frontend project templates with pre-configured security layers and CI/CD integration.

NestJS Node.js Java Docker Redis Stack CouchDB PostgreSQL GitLab CI/CD Microservices REST APIs Linux

Education

MSc in Computer Science and Technology (ongoing)

Universidad Carlos III de Madrid

2025-2026
Madrid, Spain

BSc in Software Engineering

Universidad de Sevilla

2020 – 2025
Seville, Spain

Technical Skills

Backend	Java · Spring Boot · NestJS · Node.js · ASP.NET · REST APIs · Microservices · Event-driven
Data & Infra	PostgreSQL · MySQL · Redis Stack · CouchDB · Docker · GitLab CI/CD · Linux
Other	Angular · React/Next.js · Python · JavaScript/TypeScript · Automated testing · Agile
